**DESCRIPTION**

The LTI-BR3 security glazing is an asymmetrical composite of clear or tinted glass, clear adhesive interlayers, and high quality hard-coated polycarbonate with an overall nominal thickness of 1.2880".

The demands for security glass is increasing. The LTI Ballistic Series products are custom manufactured to be utilized in secure environments where consistent quality and optimum optical clarity are priorities.

**GLAZING INFORMATION**

The LTI Group strongly suggests the use of a suitable structural security framing with an appropriate protection rating.

A minimum framing engagement of one (1) inch is recommended, (Larger lites may require deeper engagements.)

It is imperative to the life and durability of certain composite types that compatible sealant or gasket material is used on both sides of the laminate. An appropriate sealant solution can be specified by LTI if required.

The LTI Group produces the finest glass and composite laminates in the world, proper care during installation will ensure years of superior performance.
